

Introducing COVID-19 testing with Acutis Reveal™

In these matters there's no time to waste. Get the answers you need with the accuracy and clarity you've come to expect from us.

Acutis Diagnostics now offers testing for COVID-19 (2019-nCoV) using the SARS CoV-2 Real-time RT-PCR Diagnostic Panel. Offered under NYS DOH guidelines, our test validation showed **>99% sensitivity and 100% specificity within our test environment**. Our test also detects the presence of **RNase P**, a gene that indicates whether the sample was collected properly and contains sufficient human cellular material needed to detect the virus.

This pandemic demands nothing less than urgency; therefore, we are committed to delivering your results **within 24 hours** of sample receipt at the lab, while still maintaining our high standard of exactness and the clarity you demand. **Currently, we average a 10 hour turnaround time for COVID-19 sample result reporting.**

10 : 00
hours mins

**Our average turnaround time
for COVID-19 sample result reporting.**

(Data as of 07/14/2021)
